

**Delay, Closing or Early
Dismissal
of Schools Due to Inclement
Weather**

In case of inclement or severe weather, the superintendent or his designee will contact all principals, who will then be responsible for contacting their bus drivers and staff. Parents and students should be asked to listen to one of the radio or TV stations listed below for information. School personnel, who remain in constant contact with the County Emergency Management personnel, always monitor weather conditions.

If phone lines are accessible, an automated call will be generated from the district's central communication system.

If the local media is not announcing information concerning Northampton County Schools, the schools will be operating on a normal schedule.
